§433.5

level at the maximum level of energy efficiency that is life-cycle cost-effective, but at a minimum complies with paragraph (a) of this section.

EFFECTIVE DATE NOTE: At 72 FR 72570, Dec. 21, 2007, § 433.4 was amended by revising paragraph (c), effective Jan. 22, 2008. For the convenience of the user, the revised text is set forth as follows:

§ 433.4 Energy efficiency performance standard.

* * * * *

(c) If a 30 percent reduction is not lifecycle cost-effective, the design of the proposed building shall be modified so as to achieve an energy consumption level at or better than the maximum level of energy efficiency that is life-cycle cost-effective, but at a minimum complies with paragraph (a) of this section.

§ 433.5 Performance level determination.

(a) Each Federal agency shall determine energy consumption levels for both the baseline building and proposed building by using the Performance Rating Method found in Appendix G of ANSI/ASHRAE/IESNA Standard 90.1–2004, Energy Standard for Buildings Except Low-Rise Residential Buildings, January 2004 (incorporated by reference, see (433.3), except the formula for calculating the Performance Rating in paragraph G1.2 shall read as follows:

Percentage improvement = 100 x (Baseline building consumption—Proposed building consumption)/ (Baseline building consumption—Receptacle and process loads).

(b) Each Federal agency shall consider laboratory fume hoods and kitchen ventilation systems as part of the ASHRAE-covered HVAC loads subject to the 30 percent savings requirements, rather than as process loads.

§ 433.6 Sustainable principles for siting, design and construction. [Reserved]

§433.7 Water used to achieve energy efficiency. [Reserved]

§433.8 Life-cycle costing.

Each Federal agency shall determine life-cycle cost-effectiveness by using the procedures set out in subpart A of part 436. A Federal agency may choose to use any of four methods, including

lower life-cycle costs, positive net savings, savings-to-investment ratio that is estimated to be greater than one, and an adjusted internal rate of return that is estimated to be greater than the discount rate as listed in OMB Circular Number A-94 "Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs."

PART 434—ENERGY CODE FOR NEW FEDERAL COMMERCIAL AND MULTI-FAMILY HIGH RISE RESIDENTIAL BUILDINGS

Sec

434.99 Explanation of numbering system for codes.

Subpart A—Administration and Enforcement—General

434.100 Purpose.

434.101 Scope.

434.102 Compliance.
434.103 Referenced standards (RS)

434.105 Materials and equipment.

Subpart B—Definitions

434.201 Definitions.

Subpart C—Design Conditions

434.301 Design criteria.

Subpart D—Building Design Requirements—Electric Systems and Equipment

434.401 Electrical power and lighting systems.

434.402 Building envelope assemblies and materials.

434.403 Building mechanical systems and equipment.

434.404 Building service systems and equipment.

Subpart E—Building Energy Cost Compliance Alternative

434.501 General.

434.502 Determination of the annual energy cost budget.

434.503 Prototype building procedure.

434.504 Use of the prototype building to determine the energy cost budget.

434.505 Reference building method.

434.506 Use of the reference building to determine the energy cost budget.

434.507 Calculation procedure and simulation tool.

434.508 Determination of the design energy consumption and design energy cost. 434.509 Compliance.
